

TRANSXCHANGE MANAGEMENT & TIMETABLE PLANNING

Bus timetables, registered right first time.

Open, build, check and publish UK bus timetables in TransXChange 2.4 and 2.5, then see how they run with live punctuality from the Bus Open Data Service.

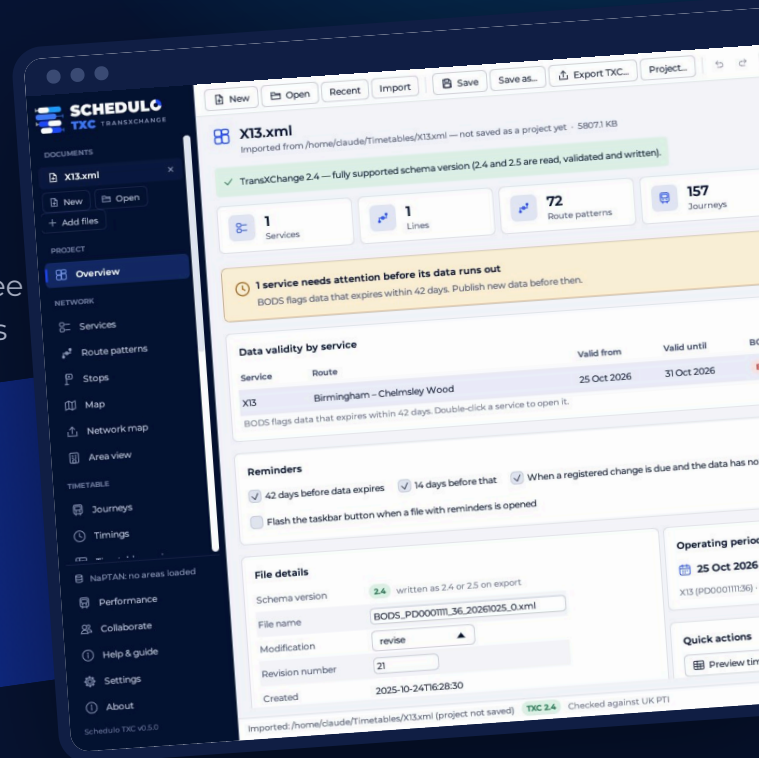

TXC 2.4 & 2.5

EXACT EXPORT

BODS READY

LIVE PUNCTUALITY

DESKTOP + BROWSER

01

Edit with confidence

Services, route patterns, journeys and days of operation, with bulk edits, full undo and a change history.

02

Publish right first time

Built-in schema validation, the UK PTI rules BODS checks, and an export that changes nothing you didn't.

03

See how it runs

Live punctuality from BODS by route, vehicle, trip and stop, against the timetable you registered.

PART OF THE
SCHEDULO
FAMILY

Everything a bus planner needs, in one place.

Schedulo TXC is built for service planners, registration staff and operators. Use the Windows app or the browser version, which is one file you open with a double-click. No installer, no server, no subscription.

Exact TransXChange 2.4 & 2.5

Open, create and combine files. The export keeps everything you didn't change, and a fidelity check proves it.

Ready for BODS

Built-in XSD validation, UK PTI and operational checks, and a Publish to BODS check with expiry reminders.

Live performance

Early, on time and late by route, vehicle, trip and stop, with a live map and alerts, straight from BODS.

Maps and network maps

Routes on OpenStreetMap, NaPTAN and rail replacement stops, and printable network maps in 12 styles.

Print in 22 styles

Timetables, books, stop posters and notices, in Welsh and English, with accessible large-print layouts.

Planning tools

Christmas and bank holiday wizard, school term dates, spreadsheet import, GTFS, connections and scheduling.

Fares and disruptions

Fare triangles and tickets with NeTEx export. Turn a road closure into a diversion and stop notices.

Collaborate and sign off

Work on a project together live, end-to-end encrypted, with roles, a change history and approval before export.

2.4 & 2.5

TransXChange read, validated and written exactly

22

print styles, plus your own templates

2 ways

Windows app or one browser file, working together

0

servers or accounts to run

Service planners

Build and change timetables quickly, and see the effect straight away.

Registration staff

Send clean, schema-valid files that pass BODS checks first time, and get reminded before data expires.

Operators

Watch punctuality live, handle disruptions, and print timetables for the public.
